4 · HOW TO MEASURE — READ FIRST

1. Measure in **centimetres**, wearing **underwear or a thin base layer only**. No shoes for height.
2. Have a second person measure you. Stand straight, relaxed, feet about 15 cm apart, breathe normally.
3. **Red rings**: keep the tape level and snug but not tight — you should fit one finger under it.
4. **Blue lines**: measure point to point exactly as drawn. Arms hang relaxed for 17, 18, 19.
5. **Waist** = at belly-button level. The same waist line is used for 3, 15, 16, 20 and 22.
6. **C7** is the bony bump at the base of the back of the neck (lower your head to find it).
7. **Ankle bone** = the outer ankle bone. Lengths 8, 20, 21, 23 and 24 all stop there.
8. **25 Torso girth**: start at the base of the front neck, go down the front, through the crotch and up the back to C7. Do not pull tight.
9. Write the **Body** column only. The **Pattern** column is completed by the factory.
10. Check the cross-checks box. Then send photos: front, side and back, standing straight, in a base layer.
